-

Professional Experience

InvestCloud 2023 - present
Project Manager

- Lead execution across 4 to 6 concurrent enterprise software implementation projects spanning three enterprise client organizations, consistently achieving 95%+ on-time milestone delivery.
- Partner daily with Product Managers, software engineers, designers, QA engineers, and business stakeholders to align priorities, coordinate deliverables, and maintain project momentum.
- Translate business and product objectives into actionable delivery plans, coordinating timelines, dependencies, scope, and release schedules.
- Facilitate sprint planning, backlog refinement, project status meetings, retrospectives, and executive reviews to ensure transparency and predictable delivery.
- Maintain project roadmaps, documentation, and risk tracking while providing stakeholders with clear visibility into project health and priorities.
- Identify execution risks early and proactively coordinate solutions across teams to keep projects on schedule.
- Manage implementation budgets averaging \$200K while forecasting resource utilization and supporting delivery planning.
- Use AI tools to assist with documentation, drafting, and communication where appropriate to improve efficiency.
- Continuously refine delivery processes through retrospectives and operational improvements that enhance collaboration and execution.

InvestCloud 2020 - 2023
Front End Developer

- Partnered with Product Managers, UX designers, and engineering teams to deliver responsive enterprise web applications supporting customer-facing financial products.
- Collaborated closely with Product Managers, UX designers, software engineers, and QA teams to deliver intuitive, customer-facing digital experiences.
- Produced technical documentation supporting implementation, testing, and production deployments.
- Mentored junior developers and contributed to improved code quality and maintainable front-end architecture.

Abstract (Freelance) 2020 - 2021

Front End Developer (Contract)

- Developed Shopify storefront features for premium consumer brands, primarily supporting Pat McGrath Labs.
- Built responsive front-end components using Liquid, SCSS, JavaScript, and React while collaborating with designers and developers.
- Contributed to the development of the interactive Shade Finder experience and other customer-facing e-commerce features.

Moxie 2014 - 2019

Sr. Project Manager

- Led multidisciplinary teams of strategists, UX designers, visual designers, developers, QA engineers, and client stakeholders delivering digital experiences for the My Verizon mobile application.
- Managed project planning, timelines, budgets, resource allocation, and execution across multiple concurrent initiatives.
- Served as the central point of communication between creative, technical, and client teams, ensuring alignment on priorities, expectations, and deliverables.
- Facilitated Agile ceremonies including sprint planning, backlog refinement, retrospectives, and release coordination.
- Partnered with executive leadership to balance staffing, project priorities, and agency delivery objectives.
- Directed implementation of WCAG accessibility standards in collaboration with UX and engineering teams, improving the accessibility and usability of digital experiences.
- Coordinated distributed onshore and offshore development teams while maintaining consistent communication and predictable delivery.

Monte Carlo Productions 2012 - 2014

Project Manager

- Managed corporate event projects from planning through execution, coordinating timelines, budgets, vendors, logistics, and client communications to ensure successful delivery.
- Led cross-functional coordination across internal teams, venues, and external partners, adapting quickly to changing priorities and maintaining high-quality client experiences in fast-paced environments.

Independent Product Development

Independent Toy Creator

- Created and independently managed the end-to-end development of an original soft vinyl collectible from concept through manufacturing, packaging, launch, and customer fulfillment.

Education

Kennesaw State University - *Bachelor of Business Administration, Marketing* - 2012

Hack Reactor - Software Engineering Immersive 2020

Certification

Certified Scrum Master - Scrum Alliance - ID # 000597105
